LAST UPDATED

Unit no.	Type	Make and model	Serial number	Location	Supplier	Installed	Warranty ends	Refrigerant	Service due

WHY KEEP A REGISTER

- Engineers need the model and serial number to bring the right parts.
- You can see at a glance which warranties are about to end.
- It helps you plan replacements before a breakdown, not after one.

SERVICE TIPS

- Book a professional service at least once a year.
- Units in hot kitchens or near ovens may need servicing more often.
- Keep invoices and engineer reports with this log.
